MORGAN STANLEY ASIA PRODUCTS LIMITED

INTERIM MANAGEMENT REPORT

The Directors present their interim management report, responsibility statement and condensed financial statements (which comprise the condensed statement of comprehensive income, condensed statement of changes in equity, condensed statement of financial position, condensed statement of cash flows and related notes, 1 to 19) of Morgan Stanley Asia Products Limited (the “Company”) for the six months period ended 30 June 2023.

RESULTS AND DIVIDENDS

The result for the period, after tax, was US\$Nil (30 June 2022: US\$Nil).

During the period, no dividends were paid or proposed (30 June 2022: US\$Nil).

PRINCIPAL ACTIVITY

The principal activity of the Company is the issuance of financial instruments, with a primary focus on the Asia markets, and the hedging of the obligations arising pursuant to such issuances.

The Company’s ultimate parent undertaking and controlling entity is Morgan Stanley which, together with the Company and Morgan Stanley’s other subsidiary undertakings, form the “Morgan Stanley Group”.

There have not been any significant changes in the Company’s principal activity in the period under review and no significant change in the Company’s principal activity is expected.

BUSINESS REVIEW

Global market and economic conditions

The global economy is facing headwinds from monetary policy tightening in developed markets and slowing growth in China. In the United States (“US”), tighter lending standards and higher interest rates is weighing on aggregate demand. In the Euro Area, monetary policy tightening is also dragging on domestic growth, with the manufacturing sector activity also weighed down by softer global growth and trade conditions. Indeed, the global new orders index within Purchasing Managers’ Index (“PMIs”) has been in contraction territory for the past three months. Overall, we expect global growth to reach 2.9% in 2023 (vs. 3.4% in 2022), below the pre-Covid trend of 3.5% year on year.

That said, cooling inflation and a gradual slowdown in the labour market suggest the Federal Reserve (“Fed”) tightening cycle is likely approaching the end. We expect one more rate hike in the July Federal Open Market Committee (“FOMC”) meeting but we expect the Fed to stay on hold post that, before beginning its rate cut cycle in the first quarter of 2024. In Europe, inflation has come in stronger than expected and as such we expect the European Central Bank (“ECB”) to deliver further rate hikes at the July and September meetings before reaching a terminal rate of 4%.

In Asia, China’s post-reopening consumption recovery has been largely on track, but weaker investment has led to renewed weakness in the economy in the second quarter of 2023. In particular, continued softness in property sector activity and a slowdown in infrastructure spending have been key drags amid delayed policy stimulus. That said, we still expect eventual fiscal and property sector easing to help drive a mild growth recovery in the second half of 2023. We project growth to reach 5.0% in 2023, vs. 3.0% in 2022.

MORGAN STANLEY ASIA PRODUCTS LIMITED

INTERIM MANAGEMENT REPORT (CONTINUED)

BUSINESS REVIEW (CONTINUED)

Global market and economic conditions (Continued)

In the region excluding China, domestic demand-oriented economies such as India and Indonesia have continued to grow at a robust pace. Central banks in the region have largely paused their rate hike cycles amid moderating inflation. Specifically in India, the Reserve Bank of India (“RBI”) kept rates on hold during June and we now expect the central bank to take up rate cuts from the first quarter of 2024 to keep real policy rates from rising to restrictive territory. On the fiscal front, the Financial Year 2024 budget remains focused on boosting infrastructure capex while keeping with the overall mild fiscal consolidation path. In Hong Kong, the Hong Kong Monetary Authority (“HKMA”) has lifted the base rate in tandem with the Fed, while on the fiscal front the government has rolled out the latest instalment of consumption vouchers to support domestic consumption in July.

Overview of financial results

The condensed statement of comprehensive income for the period is set out on page 10. The result for the period was US\$Nil which is consistent with the Company’s function and the prior period. The Company hedges its issuances with bilateral over-the-counter (“OTC”) derivative contracts classified as trading financial assets or liabilities. Net trading expense of US\$667,000 (30 June 2022: US\$143,000) represents the net fair value movement on listed and bilateral OTC derivative contracts classified as trading financial assets or liabilities. Issued listed derivative contracts on The Stock Exchange of Hong Kong Limited (“Stock Exchange”) have underlying securities predominantly in the Hong Kong market.

The condensed statement of financial position for the Company is set out on page 12. The Company’s financial position at the end of the period shows that the total assets and total liabilities were US\$24,094,000 (31 December 2022: US\$32,310,000) and US\$24,044,000 (31 December 2022: US\$32,260,000) respectively, a decrease of 25% from the prior period. The decrease during the period is primarily due to a decrease in issuances/ trading of the listed derivative contracts.

Risk management

Risk is an inherent part of the Company’s business activity. The Company seeks to identify, assess, monitor and manage each of the various types of risk involved in its business activities, in accordance with defined policies and procedures. The Company has developed its own risk management policy framework, which leverages the risk management policies and procedures of the Morgan Stanley Group. The risk management policy framework includes escalation to appropriate senior management of the Company.

Set out below is an overview of the Company’s policies for the management of financial risk and other significant business risks. More detailed qualitative and quantitative disclosures about the Company’s management and exposure to financial risks are included in note 14 to the condensed financial statements.

The Company has also entered into a financial support agreement with its immediate parent, Morgan Stanley Asia Securities Products LLC (“MSASP”), and with Morgan Stanley Hong Kong 1238 Limited (“MSHK 1238”), whereby MSASP and MSHK 1238 agree to provide financial support by way of funds injection in the form of equity capital or loan in the event the Company needs funds to fulfil its obligations and liabilities under its issuance program.

MORGAN STANLEY ASIA PRODUCTS LIMITED

INTERIM MANAGEMENT REPORT (CONTINUED)

BUSINESS REVIEW (CONTINUED)

Risk management (Continued)

Market risk

Market risk refers to the risk that a change in the level of one or more market prices, rates, spreads, indices, implied volatilities, correlations or other market factors, such as market liquidity, will result in losses for a position or portfolio. The Company is subject to market price risk exposure for its issuances, however, for each issuance, the Company enters into risk-mirroring contracts to fully hedge each type of market risk arising from its issuances. Accordingly, the Company has no net exposure to market risk.

The Morgan Stanley Group manages the market risk associated with its trading activities on a global basis, at both a trading division and an individual product level and includes consideration of market risk at the legal entity level.

Market risk management policies and procedures for the Company are consistent with those of the Morgan Stanley Group and include escalation to appropriate senior management personnel.

It is the policy and objective of the Company, not to be exposed to market risk on a net basis as a result of its issuance activities.

Credit risk

Credit risk refers to the risk of loss arising when a borrower, counterparty or issuer does not meet its financial obligations to the Company.

Credit risk management policies and procedures for the Company are consistent with those of the Morgan Stanley Group and include escalation to appropriate senior management personnel.

Credit risk exposure is managed on a global basis and in consideration of each significant legal entity within the Morgan Stanley Group.

Liquidity risk

Liquidity risk refers to the risk that the Company will be unable to finance its operations due to a loss of access to the capital markets or difficulty in liquidating its assets. Liquidity risk also encompasses the Company's ability (or perceived ability) to meet its financial obligations without experiencing significant business disruption or reputational damage that may threaten its viability as a going concern. Liquidity risk also encompasses the associated funding risks triggered by the market or idiosyncratic stress events that may cause unexpected changes in funding needs or an inability to raise new funding.

The primary goal of the Morgan Stanley Group's liquidity risk management framework is to ensure that the Morgan Stanley Group, including the Company, has access to adequate funding across a wide range of market conditions and time horizons. The framework is designed to enable the Morgan Stanley Group to fulfil its financial obligations and support the execution of the Company's business strategies. The framework is further described in note 14.

The Company hedges all of its financial liabilities arising from issuances of listed derivative contracts by entering into risk mirroring contracts with its immediate parent and other Morgan Stanley Group undertakings.

MORGAN STANLEY ASIA PRODUCTS LIMITED

INTERIM MANAGEMENT REPORT (CONTINUED)

BUSINESS REVIEW (CONTINUED)

Risk management (Continued)

Liquidity risk (Continued)

The maturity analysis provided in note 14 reflects the liquidity risk arising from the financial assets and the financial liabilities presented in a way that is consistent with how the liquidity risk on these financial assets and financial liabilities is managed by the Company. As at 30 June 2023, the Company has a payable of US\$17,444,000 (31 December 2022: US\$27,519,000) within one year from the date of the financial statements. As a result of the Company's hedging strategy, the Company has adequate financial assets to meet the settlement of this obligation. As at 30 June 2023, the Company has financial assets of US\$23,849,000 (31 December 2022: US\$31,489,000) expected to be maturing within a year from the date of the financial statements.

Operational risk

Operational risk refers to the risk of loss, or of damage to the Company's reputation, resulting from inadequate or failed processes or systems, from human factors or from external events (e.g. fraud, theft, legal and compliance risks, cyber-attacks or damage to physical assets). Operational risk relates to the following risk event categories as defined by Basel Capital Standards: internal fraud; external fraud; employment practices and workplace safety; clients, products and business practices; business disruption and system failure; damage to physical assets; and execution, delivery and process management.

The Company, through the Morgan Stanley Group, has established an operational risk framework to identify, measure, monitor and control risk. It includes escalation to the Company's Board of Directors and appropriate senior management personnel. The framework is continually evolving to reflect changes in the Company and to respond to the changing regulatory and business environment.

The Company has implemented operational risk data and assessment systems to monitor and analyse internal and external operational risk events, to assess business environment and internal control factors and to perform scenario analysis. The collected data elements are incorporated in the operational risk capital model. The model encompasses both quantitative and qualitative elements. Internal loss data and scenario analysis results are direct inputs to the capital model, while external operational incidents, business environment and internal control factors are evaluated as part of the scenario analysis process.

In addition, the Company employs a variety of risk processes and mitigants to manage its operational risk exposures. These include a governance framework, a comprehensive risk management program and insurance. Operational risks and associated risk exposures are assessed relative to the risk appetite established by the Board and are prioritised accordingly.

The breadth and variety of operational risk are such that the types of mitigating activities are wide-ranging. Examples of such activities include continuous enhancement of defences against cyber-attacks; use of legal agreements and contracts to transfer and/or limit operational risk exposures; due diligence; implementation of enhanced policies and procedures; exception management processing controls; and segregation of duties.

The Operational Risk Management Framework requires, among other things, the proper recording and verification of a large number of transactions and events as set out in the policies and procedures. The trading risk management strategies and techniques seek to balance our ability to profit from trading positions with our exposure to potential losses.

MORGAN STANLEY ASIA PRODUCTS LIMITED

INTERIM MANAGEMENT REPORT (CONTINUED)

BUSINESS REVIEW (CONTINUED)

Risk management (Continued)

Operational risk (Continued)

Primary responsibility for the management of operational risk is with the business segments, the control groups and the business managers therein. The business managers maintain processes and controls designed to identify, assess, manage, mitigate and report operational risk. Each of the business segments has a designated operational risk coordinator. The operational risk coordinator regularly reviews operational risk issues and reports to the Company's senior management within each business. Each control group also has a designated operational risk coordinator and a forum for discussing operational risk matters with the Company's senior management. Oversight of operational risk is provided by the Operational Risk Oversight Committee, regional risk committees and senior management. In the event of a merger; joint venture; divestiture; reorganisation; or creation of a new legal entity, a new product or a business activity, operational risks are considered, and any necessary changes in processes or controls are implemented.

The Operational Risk Department provides independent oversight of operational risk and assesses, measures and monitors operational risk against appetite. The Operational Risk Department works with the business divisions and control groups to help ensure a transparent, consistent and comprehensive framework for managing operational risk within each area and across the Company.

The Operational Risk Department's scope includes oversight of technology risk, cybersecurity risk, information security risk, the fraud risk management and prevention program and third party risk management (supplier and affiliate risk oversight and assessment) program. Furthermore, the Operational Risk Department supports the collection and reporting of operational risk incidents and the execution of operational risk assessments; provides the infrastructure needed for risk measurement and risk management; and ensures ongoing validation and verification of the Company's advanced measurement approach for operational risk capital.

The Company's critical processes and businesses could be disrupted by events including cyber attacks, failure or loss of access to technology and/or associated data, military conflicts, acts of terror, natural disasters, severe weather events and infectious disease. The Company maintains a resilience program designed to provide for operational resilience and enable it to respond to and recover critical processes and supporting assets in the event of a disruption impacting the Company's people, technology, facilities and third parties. The key elements of the Company's resilience program include business continuity and technical recovery planning, and testing both internally and with critical third parties to validate recovery capability in accordance with business requirements. Business units within the Morgan Stanley Group maintain business continuity plans, including identifying processes and strategies to continue business critical processes during a business continuity incident. The business units also test the documented preparation to provide a reasonable expectation that, during a business continuity incident, the business unit will be able to continue its critical business processes and limit the impact of the incident to the Morgan Stanley Group and its clients. Technical recovery plans are maintained for critical technology assets and detail the steps to be implemented to recover from a disruption impacting the assets' primary location. Disaster recovery testing is performed to validate the recovery capability of these critical technology assets.

The Company maintains a programme that oversees our cyber and information security risks leveraging the Morgan Stanley Group wide program. Our cybersecurity and information security policies, procedures and technologies are designed to protect the Company's information assets against unauthorised disclosure, modification or misuse and are also designed to address regulatory requirements. These policies and procedures cover a broad range of areas, including: identification of internal and external threats, access control, data security, protective controls, detection of malicious or unauthorised activity, incident response and recovery planning.

MORGAN STANLEY ASIA PRODUCTS LIMITED

INTERIM MANAGEMENT REPORT (CONTINUED)

Risk management (Continued)

Operational risk (Continued)

In connection with its ongoing operations, the Company utilises third-party suppliers, and anticipates that such usage will continue and may increase in the future. These services include, for example, outsourced processing and support functions and consulting and other professional services. The Company's risk-based approach to managing exposure to these services includes the execution of due diligence, implementation of service level and other contractual agreements, consideration of operational risk and ongoing monitoring of third-party suppliers' performance. The Company maintains a third-party risk program which is designed to align with its risk tolerance and meet regulatory requirements. The program includes governance, policies, procedures, and enabling technology. The third-party risk program includes the adoption of appropriate risk management controls and practices throughout the third-party management lifecycle to manage the risk of service failure, risk of data loss and reputational risk, among others.

Legal, regulatory and compliance risk

Legal, regulatory and compliance risk includes the risk of legal or regulatory sanctions, material financial loss; including fines, penalties, judgements, damages and/ or settlements, limitations on our business, or loss to reputation which the Company may suffer as a result of a failure to comply with laws, regulations, rules, related self-regulatory organisation standards and codes of conduct applicable to our business activities. This risk also includes contractual and commercial risk, such as the risk that a counterparty's performance obligations will be unenforceable. It also includes compliance with Anti-Money Laundering, anti-corruption and terrorist financing rules and regulations.

The Company, principally through the Morgan Stanley Group's Legal and Compliance Division, has established procedures based on legal and regulatory requirements on a worldwide basis that are designed to facilitate compliance with applicable statutory and regulatory requirements and to require that the Company's policies relating to business conduct, ethics and practices are followed globally.

In addition, the Company has established procedures to mitigate the risk that a counterparty's performance obligations will be unenforceable, including consideration of counterparty legal authority and capacity, adequacy of legal documentation, the permissibility of a transaction under applicable law and whether applicable bankruptcy or insolvency laws limit or alter contractual remedies. The heightened legal and regulatory focus on the financial services and banking industries globally presents a continuing business challenge for the Company.

Culture, values and conduct of employees

Employees of the Morgan Stanley Group are accountable for conducting themselves in accordance with the Morgan Stanley Group's core values *Put Clients First, Do the Right Thing, Lead with Exceptional Ideas, Commit to Diversity and Inclusion and Give Back*. The Morgan Stanley Group's core values drive a shared set of behaviours and attributes that help employees make decisions consistent with the expectations of our clients, shareholders, regulators, Board of Directors and the public. The Morgan Stanley Group is committed to reinforcing and confirming adherence to the core values through our governance framework, tone from the top, management oversight, risk management and controls, and a three lines of defence structure (business, control functions such as Risk Management and Compliance, and Internal Audit).

INTERIM MANAGEMENT REPORT (CONTINUED)

BUSINESS REVIEW (CONTINUED)

Risk management (Continued)

Culture, values and conduct of employees (Continued)

The Morgan Stanley Group's Board is responsible for overseeing the Morgan Stanley Group's practices and procedures relating to culture, values and conduct. The Morgan Stanley Group's Culture, Values and Conduct Committee, along with the Compliance and Conduct Risk Committee, are the senior management committees that oversee the Morgan Stanley-wide culture, values and conduct program, report regularly to the Morgan Stanley Group Board; and complement ongoing business and region-specific culture initiatives. A fundamental building block of this program is the Morgan Stanley Group's Code of Conduct (the "Code") which establishes standards for employee conduct that further reinforce the Morgan Stanley Group's commitment to integrity and ethical conduct. Every new hire and every employee annually is required to attest to their understanding of and adherence to the Code of Conduct.

Morgan Stanley's remuneration policies and practices ensure that there is an alignment between reward, risk, culture and conduct. Conduct, culture, and core values are considered in the employee annual performance evaluation process. The performance review process also includes evaluation of employee conduct related to risk management practices and the Morgan Stanley Group's expectations. The Morgan Stanley Group also has several mutually reinforcing processes to identify employee conduct that may have an impact on employment status, current year compensation and/or prior year compensation.

REPORT ON REVIEW OF CONDENSED FINANCIAL STATEMENTS

To the Board of Directors of Morgan Stanley Asia Products Limited
(incorporated in Cayman Islands with limited liability)

Introduction

We have reviewed the condensed financial statements of Morgan Stanley Asia Products Limited (the "Company") set out on pages 10 to 40, which comprise the condensed statement of financial position as of 30 June 2023 and the related condensed statement of comprehensive income, condensed statement of changes in equity and condensed statement of cash flows for the six-month period then ended, and certain explanatory notes. The Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited require the preparation of a report on interim financial information to be in accordance with the Company's usual accounting policies and procedures, which is International Financial Reporting Standards ("IFRSs") issued by the International Accounting Standards Board ("IASB") and Interpretations issued by the IFRS Interpretations Committee. The directors of the Company are responsible for the preparation and presentation of these condensed financial statements in accordance with International Accounting Standard 34 "Interim Financial Reporting" ("IAS 34") issued by the IASB. Our responsibility is to express a conclusion on these condensed financial statements based on our review, and to report our conclusion solely to you, as a body, in accordance with our agreed terms of engagement, and for no other purpose. We do not assume responsibility towards or accept liability to any other person for the contents of this report.

Scope of Review

We conducted our review in accordance with International Standard on Review Engagements 2410 "Review of Interim Financial Information Performed by the Independent Auditor of the Entity" issued by the IASB. A review of these condensed financial statements consists of making inquiries, primarily of persons responsible for financial and accounting matters, and applying analytical and other review procedures. A review is substantially less in scope than an audit conducted in accordance with International Standards on Auditing and consequently does not enable us to obtain assurance that we would become aware of all significant matters that might be identified in an audit. Accordingly, we do not express an audit opinion.

Conclusion

Based on our review, nothing has come to our attention that causes us to believe that the condensed financial statements are not prepared, in all material respects, in accordance with IAS 34.

MORGAN STANLEY ASIA PRODUCTS LIMITED

NOTES TO THE CONDENSED FINANCIAL STATEMENTS Six months ended 30 June 2023

1. BASIS OF PREPARATION

Accounting policies

The Company prepares its annual financial statements in accordance with IFRS issued by the International Accounting Standards Board (“IASB”) and Interpretations issued by the IFRS Interpretations Committee (“IFRIC”). The condensed financial statements have been prepared in accordance with International Accounting Standard (“IAS”) 34 ‘*Interim Financial Reporting*’.

In preparing these condensed financial statements, the Company has applied consistently the accounting policies and methods of computation used in the Company’s annual financial statements for the year ended 31 December 2022.

New standards and interpretations adopted during the period

The following amendments to standards relevant to the Company’s operations were adopted during the period. These amendments to standards did not have a material impact on the Company’s financial statements.

Amendments to IAS 8 ‘*Accounting Policies, Changes in Accounting Estimates and Errors*’: Definition of Accounting Estimates were issued by the IASB in February 2021, for prospective application in accounting periods beginning on or after 1 January 2023.

Amendments to IAS 1 ‘*Presentation of Financial Statements*’: Disclosure of Accounting Policies were issued by the IASB in February 2021, for prospective application in accounting periods beginning on or after 1 January 2023.

Amendments to IAS 12: International Tax Reform — Pillar Two Model Rules, issued by the IASB in May 2023, effective immediately.

There were no other standards, amendments to standards or interpretations relevant to the Company’s operations which were adopted during the period.

New standards and interpretations not yet adopted

At the date of authorisation of these financial statements, the following amendments to standards relevant to the Company’s operations were issued by the IASB but not mandatory for accounting periods beginning 1 January 2023. The Company does not expect that the adoption of the following amendments to standards will have a material impact on the Company’s financial statements.

Amendments to IAS 1 ‘*Presentation of Financial Statements*’: Classification of Liabilities as Current or Non-current were issued by the IASB in January 2020 and revised in July 2020 and October 2022, for retrospective application in accounting periods beginning on or after 1 January 2024. Earlier application is permitted.

MORGAN STANLEY ASIA PRODUCTS LIMITED

NOTES TO THE CONDENSED FINANCIAL STATEMENTS

Six months ended 30 June 2023

1. BASIS OF PREPARATION (Continued)

Basis of measurement

The condensed financial statements of the Company are prepared under the historical cost basis, except for certain financial instruments that have been measured at fair value as given in note 7.

Critical accounting judgements and key sources of estimation uncertainty

In preparing the condensed financial statements, the Company makes judgements and estimates that affect the application of accounting policies and reported amounts.

Critical accounting judgements are key decisions made by management in the application of the Company's accounting policies, other than those involving estimations, which have the most significant effects on the amounts recognised in the condensed financial statements.

Key sources of estimation uncertainty represent assumptions and estimations made by management that have a significant risk of resulting in a material adjustment to the carrying amount of assets and liabilities within the next financial year.

No critical accounting judgements have been made in the process of applying the Company's accounting policies that have had a significant effect on the amounts recognised in the condensed financial statements.

The key sources of estimation uncertainty are the valuation of certain financial instruments. For further details on the assumptions and estimation uncertainties in determining the fair value of certain assets and liabilities, see note 16.

The Company evaluates the critical accounting judgements and accounting estimates on an ongoing basis and believes that these are reasonable.

The going concern assumption

The Company's business activities, together with the factors likely to affect its future development, performance and position, are reflected in the interim management report on pages 1 to 7. In addition, the notes to the condensed financial statements include the Company's objectives, policies and processes for managing its capital; its financial risk management objectives; details of its financial instruments; and its exposures to credit risk and liquidity risk.

As set out in the interim management report retaining sufficient liquidity and capital to withstand market pressures remains central to the Morgan Stanley Group's and the Company's strategy.

Taking the above factors into consideration, the Directors believe that the Company will have access to adequate resources to continue in operational existence for the foreseeable future. Accordingly, they continue to adopt the going concern basis in preparing the interim report and condensed financial statements.

MORGAN STANLEY ASIA PRODUCTS LIMITED

NOTES TO THE CONDENSED FINANCIAL STATEMENTS Six months ended 30 June 2023

2. NET TRADING EXPENSE

	30 June 2023	30 June 2022
	US\$'000	US\$'000
Net trading expense on bilateral OTC derivative contracts	(39,549)	(6,188)
Net trading income on issued listed derivative contracts	39,032	6,340
Net trading expense on other listed derivative contracts	(150)	(295)
	<u>(667)</u>	<u>(143)</u>

3. OTHER REVENUE

Other revenue predominantly represents management charges to the Company's direct parent undertaking for recovery of 'Other expense', see note 5 below.

4. INTEREST INCOME

All interest income relates to financial assets at amortised cost and is calculated using the effective interest rate method.

5. OTHER EXPENSE

	30 June 2023	30 June 2022
	US\$'000	US\$'000
Fees paid	<u>2,888</u>	<u>3,574</u>

The Company issues derivative contracts listed on the Stock Exchange. Fees paid in the above table represents amounts paid to the Stock Exchange and other Morgan Stanley Group undertakings for listing and issuance of derivatives on the Stock Exchange.

6. INCOME TAX

The Government of the Cayman Islands, has not, under existing legislation, imposed any income, corporate or capital gains tax, estate duty, inheritance tax, gift tax or withholding tax upon the Company.

Hong Kong Profits Tax is calculated at 16.5% (2022: 16.5%) of the estimated assessable profit arising in Hong Kong.

No provision for taxation has been made as the Company does not have any taxable income during the period ended 30 June 2023 and 30 June 2022.

Net cash flows (used in) / from operating activities	<u><u>(8,875)</u></u>	<u><u>12,771</u></u>

13. SEGMENT REPORTING

Segment information is presented in respect of the Company's business and geographical segments. The business and geographical segments are based on the Company's management and internal reporting structure. Transactions between business segments are on normal commercial terms and conditions.

Business segment

Morgan Stanley structures its business segments primarily based upon the nature of the financial products and services provided to customers and Morgan Stanley's internal management structure. The Company's own business segments are consistent with those of Morgan Stanley.

The Company has one reportable business segment, Institutional Securities which includes the issuance of derivative contracts and the hedging of the obligations arising pursuant to such issuance.

Of the Company's total revenue, 8% (30 June 2022: 38%) arises from transactions with other Morgan Stanley Group undertakings. Further details of such transactions are disclosed in the Related Party Disclosures note 19

Geographical segment

The Company operates in one geographic region, Asia. The basis for attributing external revenue and total assets to one geographic region is determined by trading desk location.

MORGAN STANLEY ASIA PRODUCTS LIMITED

NOTES TO THE CONDENSED FINANCIAL STATEMENTS

Six months ended 30 June 2023

14. FINANCIAL RISK MANAGEMENT

Risk management procedures

Risk is an inherent part of both the Morgan Stanley Group's and the Company's business activity and is managed by the Company within the context of the broader Morgan Stanley Group. The Morgan Stanley Group seeks to identify, assess, monitor and manage each of the various types of risk involved in its business activities in accordance with defined policies and procedures. The Company has developed its own risk management policy framework, which is consistent with and leverages the risk management policies and procedures of the Morgan Stanley Group and which include escalation to the Company's Board of Directors and to appropriate senior management personnel of the Company.

The principal activity of the Company continues to be the issuance of financial instruments under an Issuance Programme and the economic hedging of the obligations arising pursuant to such issuances. It is the policy and objective of the Company not to be exposed to market risk as a result of its issuance activities. On the issuance of each financial instrument, the Company enters into economic hedges of its obligations by purchasing financial instruments from another Morgan Stanley Group entity and from the market.

Significant risks faced by the Company resulting from its issuance activities and hedging strategies are set out below.

Credit risk

Credit risk refers to the risk of loss arising when a borrower, counterparty or issuer does not meet its financial obligations to the Company.

Credit risk management

Credit risk exposure is managed on a global basis and in consideration of each significant legal entity within the Morgan Stanley Group. The credit risk management policies and procedures establish the framework for identifying, measuring, monitoring and controlling credit risk whilst ensuring transparency of material credit risks, compliance with established limits and escalating risk concentrations to appropriate senior management.

The Company may incur credit risk in its derivatives business through a variety of activities, including, but not limited to, the following:

- entering into derivative contracts under which counterparties may have obligations to make payments to the Company;
- providing short or long-term funding to Morgan Stanley Group undertakings;

The Company hedges all of its financial liabilities by entering into bilateral OTC derivative contracts with other Morgan Stanley Group undertakings and other derivative contracts. Except for cash and other derivative contracts, the Company enters into all of its financial asset transactions with other Morgan Stanley Group undertakings, and both the Company and the other Morgan Stanley Group undertakings are wholly owned subsidiaries of the same ultimate parent entity, Morgan Stanley. As a result of the implicit support that would be provided by Morgan Stanley, the Company is considered exposed to the credit risk of Morgan Stanley, except where the Company transacts with other Morgan Stanley Group undertakings that have a higher credit rating to that of Morgan Stanley.

MORGAN STANLEY ASIA PRODUCTS LIMITED

NOTES TO THE CONDENSED FINANCIAL STATEMENTS

Six months ended 30 June 2023

14. FINANCIAL RISK MANAGEMENT (CONTINUED)

Exposure to credit risk

The maximum exposure to credit risk (“gross credit exposure”) of the Company as at 30 June 2023 is disclosed below, based on the carrying amounts of the financial assets which the Company believes are subject to credit risk. The table includes financial instruments subject to Expected Credit Loss (“ECL”) and not subject to ECL. Those financial instruments that bear credit risk but are not subject to ECLs are subsequently measured at fair value. The table below does not include trade receivables arising from pending securities transactions with market counterparties as credit risk is considered to be insignificant. Where the Company enters into credit enhancements, including receiving cash and security as collateral and master netting agreements, to manage the credit exposure on these financial instruments the financial effect of the credit enhancements is also disclosed in note 15 ‘Financial Assets and Financial Liabilities Subject to Offsetting’.

The Company does not have any exposure arising from items not recognised on the balance sheet.

The Company does not hold financial assets considered to be credit-impaired.

Credit quality

Exposure to credit risk by internal rating grades

Internal credit ratings, as below, are derived using methodologies generally consistent with those used by external agencies:

Investment grade: AAA - BBB

Non-investment grade: BB - CCC

Default: D

MORGAN STANLEY ASIA PRODUCTS LIMITED

NOTES TO THE CONDENSED FINANCIAL STATEMENTS Six months ended 30 June 2023

14. FINANCIAL RISK MANAGEMENT (CONTINUED)

Credit quality (Continued)

Exposure to credit risk by internal rating grades (Continued)

The table below shows gross carrying amount by internal rating grade. All exposures subject to ECL are Stage 1, unless otherwise shown:

30 June 2023

	Gross credit exposure ⁽¹⁾⁽²⁾ US\$'000	Counterparty	Rating	Credit Grade
Subject to ECL⁽³⁾⁽⁴⁾:				
Cash	10	Standard Chartered Bank	A	Investment Grade
		Standard Chartered Bank (Hong Kong) Limited	BBB	Investment Grade
	37			
	48	ANZ Bank Limited	A	Investment Grade
		The Hong Kong and Shanghai Banking Corporation Limited	A	Investment Grade
	1,461			
		Sumitomo Mitsui Banking Corporation	A	Investment Grade
	69			
Total Cash	1,625			
Trade and other receivables	15,218	Morgan Stanley Asia Securities Products LLC	BBB	Investment Grade
		Morgan Stanley & Co. International plc	A	Investment Grade
	5,360			
Total trade and other receivables⁽⁶⁾	20,578			
Not subject to ECL⁽⁵⁾:				
Trading financial assets	330	Morgan Stanley & Co. International plc	A	Investment Grade
	48	DBS Bank limited	AA	Investment Grade
	39	Macquarie Bank Limited	A	Investment Grade
	13	Others	UR	
Total trading financial assets	430			

- The carrying amount recognised in the condensed statement of financial position best represents the Company's maximum exposure to credit risk.
- Of the gross credit exposure, intercompany cross product netting arrangements are in place which would allow for an additional US\$5,727,000 to be offset in the ordinary course of business and/ or in the event of default as given in note 15.
- Both cash and trade and other receivables are at Stage 1.
- There is minimal reversal of ECL of US\$400 on trade and other receivables.
- Financial assets measured at FVPL are not subject to ECL.
- This table does not include receivables arising from pending securities transactions with market counterparties as credit risk is considered to be insignificant.

14. FINANCIAL RISK MANAGEMENT (CONTINUED)

Credit quality (Continued)

Exposure to credit risk by internal rating grades (Continued)

1. The carrying amount recognised in the condensed statement of financial position best represents the Company's maximum exposure to credit risk.
2. Of the gross credit exposure, intercompany cross product netting arrangements are in place which would allow for an additional US\$5,967,000 to be offset in the ordinary course of business and/ or in the event of default as given in note 15.
3. Both cash and trade and other receivables are at Stage 1.
4. There is a minimal ECL of US\$1,000 on trade and other receivables.
5. Financial assets measured at FVPL are not subject to ECL.
6. This table does not include receivables arising from pending securities transactions with market counterparties as credit risk is considered to be insignificant.

Liquidity risk

Liquidity risk refers to the risk that the Company will be unable to finance its operations due to a loss of access to the capital markets or difficulty in liquidating its assets. Liquidity risk encompasses the Company's ability (or perceived ability) to meet its financial obligations without experiencing significant business disruption or reputational damage that may threaten the Company's viability as a going concern. Liquidity risk also encompasses the associated funding risks triggered by the market or idiosyncratic stress events that may cause unexpected changes in funding needs or an inability to raise new funding. Generally, the Company incurs liquidity risk as a result of its trading, lending and investing activities.

The Company's liquidity risk management policies and procedures are consistent with those of the Morgan Stanley Group. The primary goal of Morgan Stanley Group's liquidity risk and funding management framework is to ensure that the Company has access to adequate funding across a wide range of market conditions and time horizons. The framework is designed to enable the Company to fulfil its financial obligations and support the execution of its business strategies.

The following principles guide the Morgan Stanley Group's liquidity risk management framework:

- Sufficient liquid assets should be maintained to cover maturing liabilities and other planned and contingent outflows;
- Maturity profile of assets and liabilities should be aligned, with limited reliance on short-term funding;
- Source, counterparty, currency, region, and term of funding should be diversified; and
- Liquidity Stress Tests should account for stressed liquidity requirements and the amount of liquidity held should be greater than those stressed requirements.

The Company hedges all of its financial liabilities by entering into OTC derivative contracts with other Morgan Stanley Group undertakings. In general, the maturity profile of the financial assets matches the maturity profile of the financial liabilities.

The core components of the Morgan Stanley Group's liquidity management framework, which includes consideration of the liquidity risk for each individual legal entity, are the Required Liquidity Framework, Liquidity Stress Tests and the Liquidity Resources (as defined below).

MORGAN STANLEY ASIA PRODUCTS LIMITED

NOTES TO THE CONDENSED FINANCIAL STATEMENTS

Six months ended 30 June 2023

14. FINANCIAL RISK MANAGEMENT (CONTINUED)

Liquidity risk (Continued)

Required Liquidity Framework

The Required Liquidity Framework establishes the amount of liquidity the Morgan Stanley Group must hold in both normal and stressed environments to ensure that its financial condition and overall soundness is not adversely affected by an inability (or perceived inability) to meet its financial obligations in a timely manner. The Required Liquidity Framework considers the most constraining liquidity requirement to satisfy all regulatory and internal limits at a consolidated and legal entity level.

Liquidity Stress Tests

The Morgan Stanley Group uses Liquidity Stress Tests to model external and intercompany flows across multiple scenarios and a range of time horizons. These scenarios contain various combinations of idiosyncratic and market stress events of different severity and duration. The methodology, implementation, production and analysis of the Liquidity Stress Tests are important components of the Required Liquidity Framework.

The Liquidity Stress Tests are produced for Morgan Stanley and its major operating subsidiaries, as well as at major currency levels, to capture specific cash requirements and cash availability at various legal entities. The Liquidity Stress Tests assume that subsidiaries will use their own liquidity first to fund their obligations before drawing liquidity from Morgan Stanley. It is also assumed that Morgan Stanley will support its subsidiaries and will not have access to cash that may be held at certain subsidiaries. In addition to the assumptions underpinning the Liquidity Stress Tests, the Morgan Stanley Group takes into consideration the settlement risk related to intra-day settlement and clearing of securities and financial activities.

Since the Company hedges the risk of its financial liabilities with financial assets that match the maturity profile of the financial liabilities, the Company is not considered a major operating subsidiary for the purposes of liquidity risk. However, the Company would have access to the cash or liquidity reserves held by Morgan Stanley in the unlikely event that it was unable to access adequate financing to service its financial liabilities when they become payable.

The Required Liquidity Framework and Liquidity Stress Tests are evaluated on an ongoing basis and reported to the Firm Risk Committee, Asset/Liability Management Committee, and other appropriate risk committees.

Liquidity Resources

The Morgan Stanley Group maintains sufficient liquidity resources, which consist of unencumbered highly liquid securities and cash deposits with banks (including central banks) (“Liquidity Resources”) to cover daily funding needs and to meet strategic liquidity targets sized by the Required Liquidity Framework and Liquidity Stress Tests. The Company actively manages the amount of Liquidity Resources considering the following components: unsecured debt maturity profile; balance sheet size and composition; funding needs in a stressed environment inclusive of contingent cash outflows; and collateral requirements. The amount of Liquidity Resources within the Morgan Stanley Group is based on the Morgan Stanley Group’s risk tolerance and is subject to change depending on market and firm-specific events. Unencumbered highly liquid securities consist of netted trading assets, investment securities and securities received as collateral.

The Morgan Stanley Group’s Liquidity Resources, to which the Company has access, is held within Morgan Stanley and its major operating subsidiaries and is composed of diversified cash and cash equivalents and unencumbered highly liquid securities.

MORGAN STANLEY ASIA PRODUCTS LIMITED

NOTES TO THE CONDENSED FINANCIAL STATEMENTS

Six months ended 30 June 2023

14. FINANCIAL RISK MANAGEMENT (CONTINUED)

Liquidity risk (Continued)

Liquidity Resources (Continued)

Eligible unencumbered highly liquid securities include US government securities, US agency securities, US agency mortgage-backed securities, non-US government securities and other highly liquid investment grade securities.

Liquidity Resources may fluctuate from period to period based on the overall size and composition of the balance sheet, the maturity profile of our unsecured debt and estimates of funding needs in a stressed environment, among other factors.

The ability to monetise assets during a liquidity crisis is critical. The Morgan Stanley Group believes that the assets held in its Liquidity Resources can be monetised within five business days in a stressed environment given the highly liquid and diversified nature of the resources.

Funding management

The Morgan Stanley Group manages its funding in a manner that reduces the risk of disruption to the Morgan Stanley Group's and the Company's operations. The Morgan Stanley Group pursues a strategy of diversification of secured and unsecured funding sources (by product, investor and region) and attempts to ensure that the tenor of the Morgan Stanley Group's, and the Company's, liabilities equals or exceeds the expected holding period of the assets being financed.

The Morgan Stanley Group funds its balance sheet on a global basis through diverse sources, which includes consideration of the funding risk of each legal entity. These sources include the Morgan Stanley Group's equity capital, long-term borrowing, securities sold under agreements to repurchase, securities lending, deposits, letters of credit and lines of credit. The Morgan Stanley Group has active financing programmes for both standard and structured products targeting global investors and currencies.

Balance sheet management

In managing both the Morgan Stanley Group's and the Company's funding risk the composition and size of the entire balance sheet, not just financial liabilities, is monitored and evaluated. The liquid nature of the marketable securities and short-term receivables arising principally from sales and trading activities in Institutional Securities business provides the Morgan Stanley Group and the Company with flexibility in managing the size of its balance sheet.

Maturity analysis

In the following maturity analysis, trading financial assets and liabilities are disclosed according to their earliest contractual maturity; all such amounts are presented at their fair value, consistent with how these financial assets and financial liabilities are managed. All other amounts represent undiscounted cash flows receivable and payable by the Company arising from its financial assets and financial liabilities to earliest contractual maturities as at 30 June 2023 and 31 December 2022. Receipts of financial assets and repayments of financial liabilities that are subject to immediate notice are treated as if notice were given immediately and are classified as on demand. This presentation is considered by the Company to appropriately reflect the liquidity risk arising from these financial assets and financial liabilities, presented in a way that is consistent with how the liquidity risk on these financial assets and financial liabilities is managed by the Company.

Market risk

Market risk is identified by IFRS 7 'Financial instruments: Disclosures' ("IFRS 7") as the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices.

The issued listed derivative contracts expose the Company to the risk of changes in market prices of the underlying securities, interest rate risk and, where denominated in currencies other than US dollars, the risk of changes in rates of exchange between the US dollar and the other relevant currencies. The Company uses the risk mirroring contracts that it purchases from other Morgan Stanley Group undertakings to match the price risk, foreign currency and other market risks associated with the issuance of listed derivative contracts, consistent with the Company's risk management strategy. As such, the Company is not exposed to any net market risk on these financial instruments. Different components of market risks from the issued listed derivative contracts resulting into price movements in underlying securities, exchange rates and others will be offset by the same but opposite price movements in the risk-mirroring contracts. Due to Company's hedging strategy, the gain in the equity price sensitivity analysis as shown in table below will be hedged and offset by fair value movements into risk mirroring contracts.

Sound market risk management is an integral part of the Company's culture. The Company is responsible for ensuring that market risk exposures are well-managed and monitored. The Company also ensures transparency of material market risks, monitors compliance with established limits, and escalates risk concentrations to appropriate senior management.

MORGAN STANLEY ASIA PRODUCTS LIMITED

NOTES TO THE CONDENSED FINANCIAL STATEMENTS

Six months ended 30 June 2023

14. FINANCIAL RISK MANAGEMENT (CONTINUED)

Market risk (Continued)

The market price risk exposure from the financial assets is mainly equity price risk and interest rate risk, although all such risks are offset by equal and offsetting exposure to risk on the issued securities. Equity price risk refers to the risk of changes in the equity price of the assets underlying these financial assets.

Equity price sensitivity analysis

The sensitivity analysis below is determined based on the exposure to equity price risk at 30 June 2023 and 31 December 2022 respectively.

The market risk related to such equity price risk is measured by estimating the potential reduction in total comprehensive income associated with a 10% decline in the underlying asset values as shown in the table below.

	Impact on Total Comprehensive Income Gains/(losses)	
	30 June 2023	31 December 2022
	US\$'000	US\$'000
Bilateral OTC derivative contracts	(6,070)	(7,876)
Issued listed derivative contracts	6,070	7,876
	<u>—</u>	<u>—</u>

The Company's equity price risk is mainly concentrated on equity securities in Asia.

Interest rate risk

Interest rate risk is defined by IFRS 7 "Financial Instruments: Disclosures" as the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. The Company is primarily exposed to interest rate risk under this definition as a result of changes in the future cash flows of floating rate intercompany borrowing and loans held at amortised cost.

The application of a parallel shift in market interest rates of 50 basis point increase or decrease, calculated until the next reset date, to these positions, would result in a net gain or loss of approximately US\$230 (31 December 2022: US\$411) in the condensed statement of comprehensive income.

MORGAN STANLEY ASIA PRODUCTS LIMITED

NOTES TO THE CONDENSED FINANCIAL STATEMENTS

Six months ended 30 June 2023

15. FINANCIAL ASSETS AND FINANCIAL LIABILITIES SUBJECT TO OFFSETTING

In order to manage credit exposure arising from its business activities, the Company applies various credit risk management policies and procedures, see note 14 for further details. Primarily in connection with the issuance and hedging activities, the Company enters into master netting arrangements and collateral arrangements with certain counterparties. These agreements provide the Company with the right, in the ordinary course of business and/ or in the event of a counterparty default (such as bankruptcy or a counterparty's failure to pay or perform), to net a counterparty's rights and obligations under such agreement and, in the event of counterparty default, set off collateral held by the Company against the net amount owed by the counterparty.

In the condensed statement of financial position, financial assets and financial liabilities are only offset and presented on a net basis where there is a current legally enforceable right to set off the recognised amounts and an intention to either settle on a net basis or to realise the assets and the liabilities simultaneously. In the absence of such conditions, financial assets and financial liabilities are presented on a gross basis.

The following tables present information about offsetting of financial instruments.

Financial assets and financial liabilities subject to offsetting, enforceable master netting arrangements and similar agreements:

16. ASSETS AND LIABILITIES MEASURED AT FAIR VALUE (CONTINUED)

a. Financial assets and liabilities recognised at fair value on a recurring basis (Continued)

The Company's valuation approach and fair value hierarchy categorisation for all classes of financial instruments recognised at fair value on a recurring basis is as follows:

Asset and Liability / Valuation Technique	Valuation Hierarchy Classification
<i>Derivatives</i>	
Listed Derivative Contracts	
<ul style="list-style-type: none"> • Listed derivatives that are actively traded are valued based on quoted prices from the exchange. • Listed derivatives that are not actively traded are valued using the same techniques as those applied to derivative contracts. 	<ul style="list-style-type: none"> • Level 1 - listed derivatives that are actively traded • Level 2 - listed derivatives that are not actively traded
OTC Derivative Contracts	
<ul style="list-style-type: none"> • OTC derivative contracts include swap and option contracts related to equity prices. • Depending on the product and the terms of the transaction, the fair value of OTC derivative products can be modelled using a series of techniques, including closed-form analytic formulas, such as the Black-Scholes option-pricing model, simulation models or a combination thereof. Many pricing models do not entail material subjectivity as the methodologies employed do not necessitate significant judgement, since model inputs may be observed from actively quoted markets, as is the case for equity option contracts. In the case of more established derivative products, the pricing models used by the Company are widely accepted by the financial services industry. 	<ul style="list-style-type: none"> • Generally Level 2 - OTC derivative products valued using observable inputs, or where the unobservable input is not deemed significant. • Level 3 - OTC derivative products for which the unobservable input is deemed significant.

b. Transfers between Level 1 and Level 2 of the fair value hierarchy for financial assets and liabilities recognised at fair value on a recurring basis.

During the period, the Company reclassified US\$Nil (31 December 2022: US\$212,000) trading financial liabilities from Level 1 to Level 2.

c. Changes in Level 3 financial assets and liabilities recognised at fair value on a recurring basis

There were no transfers between Level 2 and Level 3 of the fair value hierarchy during current and prior period.

d. Assets and liabilities measured at fair value on a non-recurring basis

Non-recurring fair value measurements of assets or liabilities are those which are required or permitted in the condensed statement of financial position in particular circumstances. There were no assets or liabilities measured at fair value on a non-recurring basis during the current or prior period.

MORGAN STANLEY ASIA PRODUCTS LIMITED

NOTES TO THE CONDENSED FINANCIAL STATEMENTS

Six months ended 30 June 2023

17. ASSETS AND LIABILITIES NOT MEASURED AT FAIR VALUE

For all financial instruments not measured at fair value, the carrying amount is considered to be a reasonable approximation of fair value.

18. CAPITAL MANAGEMENT

The Morgan Stanley Group manages its capital on a global basis with consideration for its legal entities. The capital managed by the Morgan Stanley Group broadly includes ordinary share capital, preference share capital, subordinated loans and reserves.

The Morgan Stanley Group manages its consolidated capital position based upon, among other things, business opportunities, risks, capital availability and rates of return together with internal capital policies, regulatory requirements and rating agency guidelines. In the future the Morgan Stanley Group may expand or contract its capital base to address the changing needs of its businesses.

The Morgan Stanley Group also aims to adequately capitalise at a legal entity level whilst safeguarding that entity's ability to continue as a going concern and ensuring that it meets all regulatory capital requirements, so that it can continue to provide returns for the Morgan Stanley Group.

In order to maintain or adjust the capital structure as described above, the Company may issue new shares or sell assets to reduce debt. The Company manages its ordinary share capital of US\$50,000 (31 December 2022: US\$50,000) as capital.

The issuance of securities is part of the Company's operating activities. The Company has contractual obligations to deliver cash or underlying financial instruments to holders of the issued securities. Also, these obligations will not be settled in the Company's own equity instruments. These liabilities are not subordinated and the security holders rank equally with other creditors of the Company. The issued securities are also not contracts that evidence any residual interest in the assets of the Company. The Company therefore does not regard the financial liabilities derived from its issuance activity as part of its capital.

The Company has also entered into financial support agreement with its immediate parent, Morgan Stanley Asia Securities Products LLC ("MSASP") and with Morgan Stanley Hong Kong 1238 Limited ("MSHK 1238"), whereby MSASP and MSHK 1238 agree to provide financial support by way of funds injection in the form of equity capital or shareholder's loan in the event the Company needs funding to fulfil its obligations and liabilities under its issuance program.

19. RELATED PARTY DISCLOSURES

Parent and subsidiary relationships

Parent and ultimate controlling entity

The Company's immediate parent undertaking is MSASP, which is registered in Cayman Islands.

The ultimate parent undertaking and controlling entity and the largest group of which the Company is a member and for which group financial statements are prepared is Morgan Stanley. Morgan Stanley is incorporated in the State of Delaware, the United States of America. Copies of its financial statements can be obtained from www.morganstanley.com/investorrelations.

19. RELATED PARTY DISCLOSURES (CONTINUED)

Key management compensation

Key management personnel are defined as those persons having authority and responsibility for planning, directing and controlling the activities of the Company. Key management personnel include the Board of Directors of the Company.

Due to the nature of the Company's activities, key management personnel provide minimal services specific to the Company and as a result, no compensation is paid to key management personnel in respect of their services to the Company.

Transactions with related parties

The Morgan Stanley Group conducts business for clients globally through a combination of both functional and legal entity organisational structures. Accordingly, the Company is closely integrated with the operations of the Morgan Stanley Group and enters into transactions with other Morgan Stanley Group undertakings on an arm's length basis for the purposes of utilising financing, trading and risk management, and infrastructure services. The nature of these relationships along with information about the transactions and outstanding balances is given below. All the amounts outstanding as disclosed below are unsecured and will be settled in cash or via intercompany mechanism.

Audit fees has been borne by another Morgan Stanley Group undertaking in both the current and prior period.

Funding

The Company receives general funding from and provides general funding to other Morgan Stanley Group undertakings in the following forms:

General Funding

General funding is undated, unsecured, floating rate lending, other than certain funding which is dated on a rolling 395 day term. Funding may be received or provided for specific transaction related funding requirements, or for general operational purposes. The interest rates are established by the Morgan Stanley Group Treasury function for all entities within the Morgan Stanley Group and approximate the market rate of interest that the Morgan Stanley Group incurs in funding its business.

19. RELATED PARTY DISCLOSURES (CONTINUED)

Transactions with related parties (Continued)

General Funding (Continued)

Details of the outstanding balances on these funding arrangements and the related interest income recognised in the condensed statement of comprehensive income during the period are shown in the table below:

	30 June 2023		31 December 2022	
	Interest	Balance	Interest	Balance
	US\$'000	US\$'000	US\$'000	US\$'000
<i>Rolling 395 day term</i>				
Amounts due from the Company's direct parent undertaking	504	14,902	347	24,049
<i>Undated</i>				
Amounts due from the Company's direct parent undertaking	—	316	—	1,038
Amounts due to other Morgan Stanley Group undertakings	—	45	—	45

The Company has recognised a reversal of ECL of US\$400 (ECL expense in 2022: US\$1,000) on the above outstanding balance from related parties.

Trading and risk management

The Company issues listed derivative contracts and hedges the obligations arising from the issuance by entering into derivative contracts with other Morgan Stanley Group undertakings. All such transactions are entered into on an arm's length basis. These transactions may give rise to credit risk either for the Company, or to a related party towards the Company.

The total amounts receivable and payable on trading financial assets, trading financial liabilities, trade and other receivables and trade and other payables outstanding at the period-end were as follows:

	30 June 2023	31 December 2022
	US\$'000	US\$'000
Amounts due from other Morgan Stanley Group undertakings ⁽¹⁾	7,151	5,967
Amounts due to other Morgan Stanley Group undertakings	6,738	6,359

Six months ended 30 June 2023

19. RELATED PARTY DISCLOSURES (CONTINUED)

Transactions with related parties (Continued)

Trading and risk management (Continued)

(1) Amounts due from other Morgan Stanley Group undertakings include cash collateral of US\$5,360,000 (31 December 2022: US\$4,739,000) pledged by the Company to Morgan Stanley & Co. International plc ("MSIP") to mitigate risk on exposures arising under derivatives contracts between the Company and MSIP. The Company has received interest of US\$78,000 (31 December 2022: US\$39,000) on the cash collateral pledged to MSIP.

Fees and commissions

The Company incurs fee in respect of services performed by other Morgan Stanley Group undertaking. Fees incurred during the period are as follows:

	30 June 2023	30 June 2022
	US\$'000	US\$'000
Fees paid to other Morgan Stanley Group undertaking	<u>211</u>	<u>244</u>

Other related party transactions

The Morgan Stanley Group operates a number of intra-group policies to ensure that, where possible, revenues and related costs are matched. The Company receives management charges by recharging certain expenses, including fees paid to the Stock Exchange and to the Company's direct parent undertaking. For the period ended 30 June 2023, a management charge of US\$2,971,000 (30 June 2022: US\$3,618,000) is recognised in the condensed statements of comprehensive income arising from such policies. An outstanding receivable relating to the management charge at reporting date is included within the general funding balances disclosed above.
